## Gloss, Plump, Protect Without Chemicals

### Meet INIKA's New Lip Collection: Colour and Care, Zero Nasties.

Many lipsticks from big cosmetic brands in the UK have been found to contain heavy metals and others are still using parabens, a potential hormone disruptor, as a preservative in their formulations.

Manufacturers of these products will argue that they use safe, permitted levels, but have you considered repeated exposure, the more you apply the more exposure you have.

You do not need these chemicals and metals. You can have beautiful, high performing cosmetics without chemicals. Introducing the new lip collection from INIKA, colour and treatment in one and with no harmful ingredients

**Lip Oil and Tinted Lip Oil:** A luxuriously smooth, hydrating lip oil, infused with plant-based Collagen, Bakuchiol & Squalane that leaves lips, with a glossy and naturally-plump finish. Clear or tinted

**Lip Serum:** 100% natural, lip-loving active ingredients to promote smoother, plumper, more hydrated lips. A rich silky fluid helps to minimise the appearance of fine lines and enhance lip fullness, while protecting against dryness. Clear or tinted.

**Lip Mask:** An intensive, reparative lip treatment that leaves lips soft, supple and plump. AHA's clear the way for reparative actives to melt deeper into lips. The advanced anti-ageing formula combines essential fatty acids in Prickly Pear with collagen-boosting Bakuchiol to help reduce the appearance of fine lines and promote softer, fuller lips.
